

Taig Y Axis Extension Kit – 6 Hole vs: 8 Hole Version

Z axis with head removed. This is the 6 hole version of the dovetail. In this version the dovetail is about 3-1/2" long. The 8 hole version has a dovetail which is about 4-1/2" long and has 8 holes.

Continued on next page.

A not too great picture of a 6 hole installation. Note the callouts of the parts. Determination of a 6 hole version versus an 8 hole version can be made by measuring the dovetail. The 6 hole version is about 3-1/2" long. The 8 hole version is about 4-1/2" long.
